PROFESSIONAL SUMMARY

MCA graduate and AI/ML enthusiast with a strong foundation in programming, machine learning, and deep learning. Developed AI-based projects, including an Intelligent Skin Cancer Detection system using hybrid deep learning and machine learning models, published and presented at the IEEE ICNWC 2026 conference. Possesses technical knowledge of Python, Java, SQL, NumPy, and Pandas, with an understanding of computer vision and AI-driven problem-solving.

KEY SKILLS

Languages & Tools	: Python, SQL (MySQL), Git/GitHub, Google Colab, Java
Python Libraries	: NumPy, Pandas
AI / ML Technologies	: Machine Learning, Deep Learning, Computer Vision, Image Classification, Feature Extraction, Object Detection, Player Tracking
DL & ML Models	: MobileNetV2, Support Vector Machine (SVM), Convolutional Neural Networks (CNN)
Tools & Platforms	: Google Colab, Gradio
Professional	: Communication, Research Documentation, Analytical Thinking, Problem Solving

PROJECTS & RESEARCH

Intelligent Skin Cancer Detection Using Hybrid Deep Learning and Machine Learning Model - *IEEE Publication — ICNWC 2026*

- Published and presented original research on AI-based skin cancer detection at the IEEE ICNWC 2026 conference.
- Developed a hybrid classification model using MobileNetV2 for feature extraction and Support Vector Machine (SVM) for skin cancer classification.

AI-Powered Basketball Player Tracking and Performance Analysis System *Jan – Apr 2025*

- Developed an AI-based computer vision system to detect and track basketball players and monitor their positions.
- Implemented object detection and coordinate tracking to support real-time player movement analysis and visual representation of gameplay performance.

EDUCATION

Master of Computer Applications (MCA)

Hindustan Institute of Technology and Science, Chennai *Aug 2024 – May 2026*

CGPA: 7.01/10

Bachelor of Computer Science (BSC.CS)

Hindustan collage of Arts & Science *Aug 2021 – May 2024*

Percentage: 53.9%

INTERNSHIPS & EXPERIENCE

Research Intern – Artificial Intelligence *Jan – Apr 2025*

Hindustan Institute of Technology and Science, Chennai

- Developed an AI-based basketball player tracking system using computer vision to detect players and track their positions.
- Implemented player coordinate tracking and visualized movement data to analyze gameplay patterns and performance metrics.
- Conducted research and worked on AI-related concepts as part of a collage research internship.
- Explored artificial intelligence and machine learning techniques through project-based research.

ACHIEVEMENTS

- **IEEE Conference Presenter** – Presented the research paper *"Intelligent Skin Cancer Detection Using Hybrid Deep Learning and Machine Learning Models"* at the IEEE ICNWC 2026 conference.
- **IEEE Research Publication** – Published original research on AI-based skin cancer detection using a hybrid deep learning and machine learning approach.

CERTIFICATIONS

- **Introduction to Algorithms and Analysis** – Elite Certificate, NPTEL / IIT Kharagpur (SWAYAM)
- **Web Designing & WordPress Development** – Professional Certification
- **Cyber Security** – Advanced Professional Certificate
